Summary

Aspiring AI/ML Engineer with strong foundations in Python, data structures, and machine learning concepts. Experienced in building real-world projects including AI assistants and web-based platforms. Skilled in problem solving, system design, and applying AI concepts to practical use cases. Actively learning advanced machine learning and deep learning techniques..

Technical Skills

Programming Languages: Python, C++, Java, HTML, CSS, JavaScript

Core Concepts: Data Structures, Algorithms, Problem Solving

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, VS Code, Jupyter, Vercel

Projects

Disaster Relief Coordination Platform 2025
Web-Based Application *Live — GitHub*

- Developed a platform to connect disaster victims with volunteers and resources in real time
- Designed workflows for request handling, coordination, and information sharing
- Implemented frontend-backend interaction for efficient data communication
- Focused on usability and structured data flow for emergency scenarios

Personal Portfolio Website 2025
Web Development Project *Live — GitHub*

- Built a responsive portfolio website to showcase projects and technical skills
- Integrated GitHub repositories and deployed using Vercel
- Designed clean and accessible UI for improved user experience

Education

Apex Institute of Technology Mohali, India
Bachelor of Engineering (B.E.) in Computer Science (AI & ML) *2024 – 2028*

H.B.J. College Madhubani, India
Senior Secondary Education (Class XII) – 78% *2021 – 2023*

Indian Public School Madhubani, India
Secondary Education (Class X) – 79% *2021*

Certifications

- Introduction to Large Language Models – Google Cloud 2025
- Foundations of AI and Machine Learning – LinkedIn 2025
- Responsible AI – Google Cloud 2025
- Ethical Considerations for Generative AI – IBM 2025
- Python Data Structures – University of Michigan 2024
